

Marcos Alejandro Mora

ID: 16510db3-8553-419d-ada3-dae30eca6ebe

Birth Date: 5 April 1980

Email: abreu760@hotmail.com

Profile: www.credly.com/users/marcos-mora.8f4771de

IBM Full Stack Software Developer Professional Certificate (V5)

Issued by: Coursera

Authorized by: IBM

Issued to: Marcos mora

Issued on: 11 November 2025

Description: This credential earner has the technical skills to become a full stack cloud native application developer: building, deploying, testing, and managing cloud native apps. They have language skills including HTML, CSS, JavaScript, Node.js, React, and Python. They have demonstrated proficiency with container technologies and databases, and understand GitHub and concepts such as CI/CD, security, microservices, and serverless computing. They can develop solutions using Gen AI-powered tools and models.

FIBAA

Total Credits: 6 Grade: Pass

Credit Recommendation:

- 6 semester hours

American Council on Education

Course Number: IBM-0020 (v.2) Total Credits: 18 Grade: Pass

Credit Recommendation:

- 3 semester hours in Web Development with HTML, CSS, and JavaScript in the lower-division undergraduate category
- 3 semester hours in Python Programming for Data Science in the lower-division undergraduate category
- 3 semester hours in Cloud Applications in the upper-division undergraduate category
- 3 semester hours in Introduction to Cloud Computing in the lower-division undergraduate category
- 3 semester hours in Introduction to Databases in the lower-division undergraduate category
- 3 semester hours in Application Development Using Microservices in the upper-division undergraduate category

Introduction to HTML, CSS, & JavaScript

Issued by: Coursera

Authorized by: IBM

Issued to: Marcos mora

Issued on: 14 July 2025

Description: The badge holder demonstrates proficiency in defining the roles of front-end, back-end, and full-stack developers, explaining how they collaborate on development projects. They understand the languages used for web development and are proficient in the concepts of HTML and CSS technologies to support web development and JavaScript to make web pages more dynamic. They can build a basic website, format the layout for web applications, and enhance their website by offering user interactivity.

Software Engineering Essentials

Issued by: [Coursera](#)

Authorized by: [IBM](#)

Issued to: Marcos mora

Issued on: 18 July 2025

Description: The badge earner has demonstrated an understanding of the software development lifecycle and the software building process. They have a foundational knowledge of software development and the tools used for it and can identify basic programming constructs. They can describe various types of system architectures, software architectures, and deployments. The badge earner can also identify the skills needed for software development roles and describe career opportunities for software engineers.

Git and GitHub Essentials

Issued by: [Coursera](#)

Authorized by: [IBM](#)

Issued to: Marcos mora

Issued on: 21 July 2025

Description: This badge earner has demonstrated how to use Git and GitHub as code repositories for developing applications. They understand why version control is essential in creating open-source and commercial software. The badge earner can create repositories and branches, perform pull requests and merge operations, and use these repositories to collaborate with their teammates.

Front-end Development with React V2

Issued by: [Coursera](#)

Authorized by: [IBM](#)

Issued to: Marcos mora

Issued on: 9 August 2025

Description: This credential earner demonstrated how to use the React web framework to create robust user interfaces for front-end applications. They can manage data in an application with props, states, and hooks. The earner has shown an understanding of Redux concepts, such as using the Redux store, actions, and reducers to manage application states. They know the applications of middleware such as Thunk and Saga to handle asynchronous operations and concepts such as side effects and custom hooks.

[Node and Express Essentials](#)

Issued by: Coursera

Authorized by: IBM

Issued to: Marcos mora

Issued on: 21 August 2025

Description: The credential earner has demonstrated the ability to develop server-side applications with Node.js and Express using asynchronous callback functions with promises. The earner of this badge can apply knowledge of routing, middleware, and templating; and use node package manager to manage dependencies and modules. The individual has completed a project to create a Node-based RESTful API and tested it with various CRUD operations.

[Python Project for AI and Application Development](#)

Issued by: Coursera

Authorized by: IBM

Issued to: Marcos mora

Issued on: 7 September 2025

Description: This badge earner is able to apply foundational Python skills by implementing different techniques to develop applications and AI powered solutions. The individual has acquired the confidence to begin developing AI enabled applications using Python, build and run unit tests, and package the application for distribution.

[Developing Applications with SQL, Databases, and Django](#)

Issued by: Coursera

Authorized by: IBM

Issued to: Marcos mora

Issued on: 18 September 2025

Description: This credential earner has demonstrated foundational knowledge of developing applications with SQL, databases, and Django. The individual understands fundamental database concepts, such as the basics of SQL and how Object-Relational Mapping (ORM) allows you to use Object-Oriented Programming (OOP) languages to work with databases. The earner also has hands-on experience creating a Django web app to persist, process, and present data on a cloud-based web application.

[Containers & Kubernetes Essentials](#)

Issued by: Coursera

Authorized by: IBM

Issued to: Marcos mora

Issued on: 30 September 2025

Description: This badge earner is able to build and run a container image and understands Kubernetes architecture. They know how to: write a YAML deployment file; expose deployment as a service; manage applications with Kubernetes; use ReplicaSets, auto-scaling, rolling updates and service binding; deploy services; and reap the benefits of OpenShift, Istio and other key tools.

Application Development using Microservices and Serverless

Issued by: [Coursera](#)
 Authorized by: **IBM**
 Issued to: Marcos mora
 Issued on: 13 October 2025

Description: The badge earner understands the concept of twelve-factor apps and microservices and how they relate to the software delivery lifecycle. The learner has demonstrated proficiency in creating and testing Swagger documentation for REST API endpoints. In addition, they can make API requests using cURL and Postman technologies. The badge holder can create a serverless function. They can build and deploy applications using container images on the code engine.

Full Stack Software Developer Assessment V2

Issued by: [Coursera](#)
 Authorized by: **IBM**
 Issued to: Marcos mora
 Issued on: 20 October 2025

Description: This credential earner has demonstrated advanced knowledge of Full Stack Application Development. The individual has shown proficiency in key Full Stack Developer concepts and capabilities. The earner has also successfully completed an exam that tests their knowledge of cloud native applications and services, HTML, CSS, JavaScript, Django, React, JSON, IBM Code Engine, MongoDB, Node.js, Python, Docker, and Kubernetes.

Software Developer Career Guide and Interview Preparation

Issued by: [Coursera](#)
 Authorized by: **IBM**
 Issued to: Marcos mora
 Issued on: 15 November 2025

Description: This badge earner comprehends the software engineering role, career paths, and opportunities. They can build a foundation for a job search, research job listings, write a resume, and make a portfolio. They know what to expect during a job interview and how to prepare for interviews. The badge earner can demonstrate how to give an effective interview, including techniques for answering questions and making a professional personal presentation.

[Generative AI Essentials for Software Developers](#)

Issued by: Coursera

Authorized by: IBM

Issued to: Marcos mora

Issued on: 15 November 2025

Description: The badge earner has demonstrated their understanding of AI tools and algorithms to generate, review, and debug code. They can design software architectures and integrate software workflows by leveraging Generative AI. They can explain the ethical considerations of using AI in their projects. The badge earner has demonstrated their skills to use Generative AI tools to perform software development processes including design, coding, and testing effectively and for secure coding practices.

[Develop Generative AI Applications: Get Started](#)

Issued by: Coursera

Authorized by: IBM

Issued to: Marcos Alejandro Mora Abreu

Issued on: 10 March 2026

Description: The badge earner has demonstrated their understanding of the fundamentals of generative AI applications and the LangChain framework. They can describe how prompt engineering and in-context learning can enhance AI interactions. They can apply prompt templates, chains, and agents to create flexible and context-aware AI applications. They can develop a generative AI web application with Flask. They can compare different large language models and select the most appropriate for a use case.

[Advanced RAG with Vector Databases and Retrievers](#)

Issued by: Coursera

Authorized by: IBM

Issued to: Marcos Alejandro Mora Abreu

Issued on: 17 March 2026

Description: The badge earner has demonstrated an understanding of advanced retrievers in LangChain and LlamaIndex, and can use them to retrieve text from documents. They understand vector databases such as FAISS and Chroma DB and can explain their differences and use cases. The earner can perform semantic similarity search, utilize indexing methods, explain the HNSW algorithm and can build interactive RAG applications using a variety of libraries and frameworks, including LangChain, LlamaIndex, and Gradio.

[Vector Databases for RAG: An Introduction](#)

Issued by: Coursera

Authorized by: IBM

Issued to: Marcos Alejandro Mora Abreu

Issued on: 17 March 2026

Description: The badge earner has demonstrated an understanding of vector databases and their types, how they differ from traditional databases, and why to use them for RAG applications. They can explain similarity search and perform it manually. They understand Chroma DB concepts and know how to perform metadata filtering, full-text search and similarity search in Chroma DB. The badge earner can explain the basics of indexing and can build recommendation systems and RAG applications using Chroma DB.

[Build RAG Applications: Get Started](#)

Issued by: [Coursera](#)

Authorized by: [IBM](#)

Issued to: Marcos Alejandro Mora Abreu

Issued on: 17 March 2026

Description: The badge earner has demonstrated an understanding of the fundamentals of Retrieval-Augmented Generation (RAG), and can explain how RAG enhances information retrieval and the quality of LLM responses. They can build interactive RAG applications using LangChain or LlamaIndex with a Gradio-based user interface. Furthermore, they can compare and contrast LangChain and LlamaIndex, making informed decisions about which framework best suits general project goals and design philosophies.

[Fundamentals of Building AI Agents](#)

Issued by: [Coursera](#)

Authorized by: [IBM](#)

Issued to: Marcos Alejandro Mora Abreu

Issued on: 25 March 2026

Description: The badge holder can develop AI agents that can reason and perform tasks independently. They can implement tool calling and chaining to enable structured workflows and controlled task execution. The badge holder can use LangChain's built-in agents for natural language data analysis, visualizations, and database queries. They can also apply best practices in prompt engineering and tool orchestration to enhance AI agent performance and demonstrate AI workflow design and implementation skills.

[Agentic AI with LangChain and LangGraph](#)

Issued by: [Coursera](#)

Authorized by: [IBM](#)

Issued to: Marcos Alejandro Mora Abreu

Issued on: 26 March 2026

Description: The badge earner can build agentic AI systems using LangChain and LangGraph. Design and implement self-improving agents using Reflection, Reflexion, and ReAct architectures. They can apply agent orchestration techniques to build collaborative multi-agent systems, and also implement agentic RAG systems that route queries and support retrieval-enhanced reasoning.

**IBM RAG and Agentic AI Professional Certificate**Issued by: [Coursera](#)Authorized by: [IBM](#)

Issued to: Marcos Alejandro Mora Abreu

Issued on: 29 March 2026

Description: The badge earner has expertise in building RAG, multimodal, and agentic AI applications. They have mastered how to design and chain AI tools with LangChain to create modular, reusable generative AI workflows. They can implement function calling, RAG, and vector stores to develop intelligent context-aware applications. They can build autonomous agents using LangGraph, CrewAI, AG2 (AutoGen), BeeAI, and the Model Context Protocol (MCP) to design and deploy AI solutions for real-world problems.

END OF TRANSCRIPT

YOUR PARTNER FOR EXCELLENCE
IN HIGHER EDUCATION **FIBAA**

FIBAA TRANSCRIPT LEGEND

This transcript contains credentials certified by FIBAA – Foundation for International Business Administration Accreditation. The following policies apply only to FIBAA certified credentials within the transcript. FIBAA certifications support the recognition of prior learning by validating formal learning experiences gained outside European Higher Education Institutions against academic standards in the European Higher Education Area (EHEA), thus supporting learners to apply for and gain recognition of ECTS (European Credit Transfer System) credits when entering an academic programme in Europe.

[FIBAA \(Foundation for International Business Administration Accreditation\)](#) is a European quality assurance agency for higher education and continuing education programmes. Founded in 1994, FIBAA is registered as an accreditation agency in Germany, Austria, Switzerland and further countries in Europe and abroad. In Europe, FIBAA is a member of ENQA (European Association for Quality Assurance in Higher Education) and of CEENQA (Central and Eastern European Network of Quality Assurance) and registered with EQAR (European Quality Assurance Register for Higher Education). On a trans-European level, FIBAA is member of INQAAHE (International Network for Quality Assurance Agencies in Higher Education) and AQAN (ASEAN Quality Assurance Network).

Each FIBAA certification is conducted by a team of experienced university faculty, an expert from professional practice and a qualified student. The panel team assesses the content, scope, and rigor of an organization's educational programme against the standards of the ESG (European Standards and Guidelines), the ECTS Users' Guide and the EQF (European Qualification Framework). The panel team makes appropriate recommendations for comparable ECTS credits and competencies achieved by students. For more information on processes and standards for FIBAA reviews, visit [FIBAA: Certification Procedures](#).

DEFINITIONS

FIBAA Endorsement: Credentials that carry a FIBAA endorsement of recommended ECTS credits are designated by the FIBAA logo in the left margin.

Name: Legal name as entered by the student at the time of transcript request. Because students may complete courses from multiple organizations, each credential also includes the name under which the credential was issued for tracking and verification if necessary.

Issued on: The date when the student completed the associated credential.

Credit Recommendations: Recommendations for credits are designated in ECTS. Each recommendation includes a total number of ECTS credits recommended and an EQF level assignment. Levels for which recommendations are issued include EQF levels 5 (mapping short cycle QF-EHEA), 6 (mapping first cycle QF-EHEA), 7 (mapping second cycle QF-EHEA) and 8 (mapping third cycle QF-EHEA).

Grade: FIBAA-endorsed credentials are only included on this official transcript if the student achieved a passing grade. FIBAA certification includes a validation of the assessments to be conducted by the learners, ensuring the assessments' appropriateness to reach the learning objectives on the assigned EQF level.

Intended EQF-Level: FIBAA certification includes a validation of the intended EQF level of the course to ensure learning objectives on EQF levels 5-8 (mapping the QF-EHEA levels short cycle, first cycle, second cycle, and third cycle, respectively).

RESOURCES

Additional information on FIBAA-endorsed educational programs, such as learning outcomes, assessment methods, etc. can be found at [FIBAA: Certification Procedures](#).

Inquiries: Please address inquiries to FIBAA – Foundation for Internationale Bsinsees Administration Accreditation, Berliner Freiheit 20-24, D-53111 Bonn, Email: info@fibaa.org, Phone: +49(0)228-2803560

Technical Support: For technical support, visit the Credly Help Center: <https://support.credly.com/hc/en-us>

Alteration of this document may be a criminal offense.

ACE TRANSCRIPT LEGEND

The ACE Transcript is an official transcript that contains credentials evaluated by the American Council on Education (ACE). The following policies apply only to ACE-endorsed credentials within the transcript. ACE Learning Evaluations connects workplace learning with colleges and universities by assessing the quality and equivalency of nontraditional experiences. ACE's recommendations are intended to guide institutional decisions about the award of credit for prior learning.

ACE Learning Evaluations reviews are conducted by experienced college and university faculty who assess the content, scope, and rigor of an organization's educational program and make appropriate recommendations for comparable college credit and competencies achieved by learners. For more information on processes and standards for ACE reviews, visit <https://www.acenet.edu/Programs-Services/Pages/Credit-Transcripts/Colleges-Universities.aspx>.

DEFINITIONS

Issued On: The date when the learner completed the associated credential.

Issued For: The learner's legal name as entered by the learner at the time of transcript request.

American Council on Education Endorsement: Credentials that carry an ACE endorsement of recommended college credits or validated competencies published on the ACE National Guide.

Course Number (ACE ID): ACE assigns a unique identifier to ACE-endorsed credentials (e.g., ACE-0001 (v.1)). The letter prefix designates the organization providing the experience. Version number is based on the date that the credential was earned.

Credit Recommendations: Contain academic subject area(s) recommended for credit aligning to a college course. Credit recommendations are designated in semester hour units (SH). Levels at which recommendations are issued include vocational/certificate, lower division (100–200 level courses), upper division (300–400 level courses), and graduate (500+ level courses).

Competencies: These competency statements are from recognized, industry-approved frameworks, and have been validated by the faculty team as outcomes demonstrated by learners who successfully complete the evaluated learning experience. They represent workplace-relevant skills, knowledge, and abilities expected of professionals in corresponding industries.

Grade: ACE-endorsed credentials are only included on this official transcript if the student achieved a passing grade. ACE-endorsed courses and exams meet the following minimum grading requirements: Students must earn a minimum grade of C for vocational/certificate, lower division, and upper division credit and a minimum grade of B for graduate-level credit. The credential provider might also supply the learner's actual grade under Evidence in the Learner's badge. Click on the Credential Title to access the badge issued to the learner.

RESOURCES

Additional information on ACE-endorsed educational programs, such as learning outcomes, assessment methods, etc., can be found in the ACE National Guide at <https://www.acenet.edu/national-guide/>. Military training and occupations that carry college credit recommendations can be found in the ACE Military Guide at <https://www.acenet.edu/Programs-Services/Pages/Credit-Transcripts/military-guide-online.aspx>.
